

Social Services and Wellbeing Act Population Needs Assessment

Summary of priorities, actions and process steps

'What it is and what it is not!'

- 1. This PNA is not an exhaustive list of graphical data but includes appendices where further data is included and will include links to other supporting information such as the local Wellbeing Assessments required under the Wellbeing of Future Generations Act – we do not want to duplicate large sections of information in this PNA which is included in other documents
- 2. This PNA is based on the views of citizens and providers, and co-production is a core design principle. Citizens and providers helped identify the emerging areas of interest under each core theme.
- 3. This PNA is not adopting a 'blank canvass' approach as there are a number of previously completed, and current, needs assessments and market position statements that include useful intelligence. Also, national reports such as NHS Adverse Childhood Experiences provide invaluable data that this PNA will incorporate, but not replicate.
- 4. The core theme chapters will also include a list of suggested actions to be included in the underpinning regional Area Plan required following the publication of this PNA again this list is not exhaustive but a starting point for consultation!
- 5. This PNA is the first of its kind and will set the direction of travel for health and social care services it is the 'shop window' in terms of priorities and next steps and more detailed analysis, mapping of services and actions will be set out in the regional Area Plan required by April 2018.
