### 1. Regional Context

The EAS is the school improvement service for the five LAs in South East Wales (Blaenau Gwent, Caerphilly, Monmouthshire, Newport and Torfaen). The number of pupils of compulsory school age in 2016 was 70,642. This represents 19% of all pupils in Wales. There are 238 maintained schools in the region, 15% of all maintained schools in Wales (PLASC, 2016). The percentage of pupils of compulsory school age who are eligible for free school meals is 20.1%, which is higher than the national figure of 18.4%. This level of eligibility is the highest of the four regional consortia (PLASC, 2016). In the region, 10% of people aged three and over say that they can speak Welsh compared to the Wales average of 19% (2011 Census, ONS). As of 30 September 2016, ethnic minorities account for 4.5% of the population in the region and this is similar to the Wales average (4.6%). As of July 2016, 777 children in the region are looked after by a local authority and attend a school in the region. This represents 14% of looked-after children in Wales.

#### 2. Introduction

This Business Plan (2017-2020) outlines the programme of work that is required to accelerate outcomes for children and young people across all schools in South East Wales. The plan focuses on the urgent need to raise aspiration and accelerate improvement in pupil outcomes, improve the quality of teaching and leadership and build a self-improving system within and across schools. The rapid improvements that are required will need a strong commitment of partnership working to be successful. The EAS self-evaluation process has identified progress made in previous years, but most importantly the areas that require improvement across the region this academic year. These are noted in the summaries and graphs below:

#### 3. Business Plan (2017-2018) Objectives

This Business Plan focuses upon the actions that are required to accelerate improvement across the region. Whilst this plan is regional, the bespoke approach at school level and through each individual LA Annex enables all nuances in need to be addressed. The actions contained within the plan align with the Welsh Government strategic document 'Qualified for Life' (sections 1-6). Further details on delivery can be found in the 'Detailed Delivery Document' and the 'Professional Learning Offer 2017-2018'.

#### 3.1. Business Plan process

The EAS has procedures for self-evaluation and planning for improvement that are systematic, responsive and flexible, and provide the service with a platform from which to refine school improvement services to become more effective and efficient.

The half-yearly review of progress towards Service Area Plans in November 2016 indicated that almost all service areas demonstrated at least satisfactory progress towards meeting the objectives at that point in the year. Effective procedures for monitoring, challenge, support and intervention that are differentiated by need are in place. These procedures are underpinned by effective systems that, when implemented consistently, will ensure the impact required to accelerate improved pupil outcomes.

This Business Plan will be reviewed on a half-yearly basis and will be reported through the agreed governance arrangements. In addition, interim progress checks will be completed through the FADE approach. The Business Plan incorporates actions to address the recommendations of the Estyn / Wales Audit Office Inspection, 'A report on the quality of the school improvement services provided by the EAS Consortium' May 2016:

R1: Consider the use of a wider range of performance indicators at school and regional level to ensure that the progress of all groups of learners is challenged and supported;

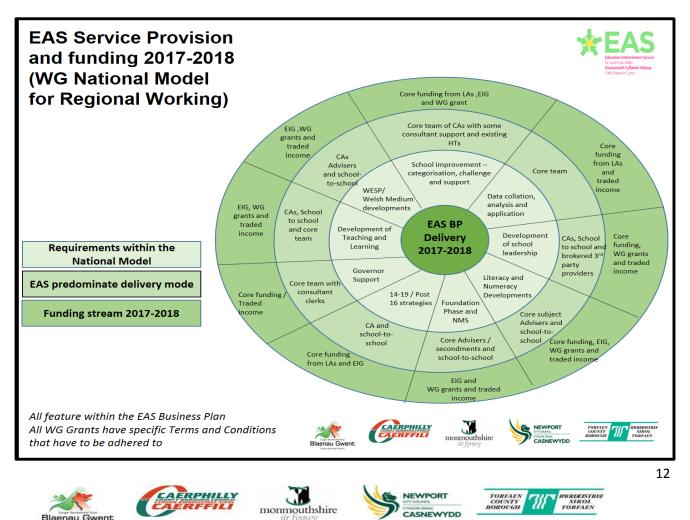

R2: Improve consistency in the quality of evaluation of school improvement activities throughout the service; and

R3: Identify and manage risks more effectively.

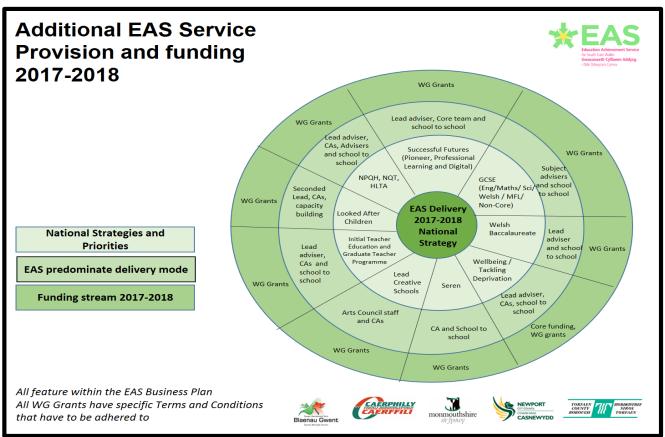

A summary of the findings from the full report is below:

Section	Grade
Support for school improvement	Good
Leadership	Good
Quality improvement	Good
Partnership working	Good
Resource management	Good

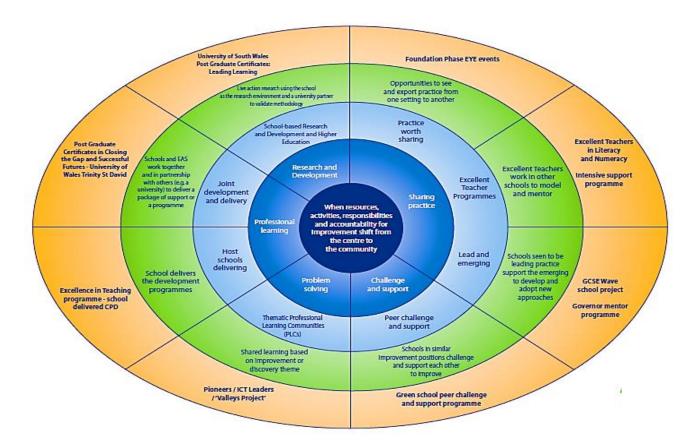

The diagram below explains the EAS approach to implementing the National Model for Regional Working and the delivery of the National Policy:

4. Regional strategy to address National Priorities and embed the Self-Improving System

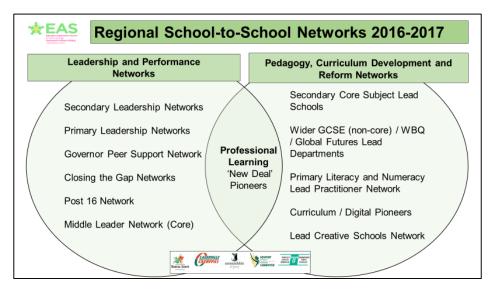

The regional definition of the self-improving system is one in which:

- Resources shift from the centre to the system, from the EAS to schools, so that schools have the time, money and people in place to support their own improvement and improvement in other schools
- **Activities** shift from central locations to schools, so that teachers and leaders work in live educational settings where real teaching, learning and leadership are happening
- **Responsibilities and Accountability** shift from the centre to the place where improvement is happening, so that schools share accountability for improvement of other schools

The EAS intends, during the period of the plan, to develop capacity in and improve the performance of the system in:

- Sharing practice, where we will improve the ways in which teachers or leaders share what they do and reflect together on why it works and how it could be adopted or adapted. This will include activities such as practice worth sharing, Excellent Teacher Programmes and pairing lead and emerging schools.
- Challenge and support, where we will improve the ways in which teachers or leaders challenge each other to improve and support each other to find ways to address the challenge.
- Problem solving, where we will improve the ways in which professionals work together to identify a problem and design and implement a solution.
- Professional learning, where we will improve the ways in which schools, teachers, leaders and others work together to deliver programmes of professional development to each other, including activities such as host schools delivering development programmes and schools and the EAS working together and in partnership with others to deliver a package of support or a programme.
- Research and development, where we will improve the ways in which we all work together to explore new areas of work and experiment with solutions that have not been tried before.

This image shows how the EAS has structured and prioritised its work to deliver the national priorities. In our establishment of leadership and performance networks, we have focused on the relationships between school leaders, leadership teams, the EAS workforce and governors. This work has enabled us to focus on the key priorities in leadership across all phases in our schools (including Post-16) on improving the quality of leadership in our schools and settings, and on the key priority of closing the gap between the achievement of priority groups of learners.

14

In the pedagogy, curriculum development and curriculum reform networks we have mobilised groups of schools around the emerging priorities from WG, such as non-core GCSEs and Welsh Baccalaureate. Running across the two domains, we have a well-established and funded network of over 20 Professional Learning school providers, who cover all the milestones in the WG matrix plus engage with our partner universities in the delivery of initial teacher education. These are the schools who in the next phase of development will underpin the realisation of the Successful Futures curriculum and the pedagogy and assessment expertise required by it.

In the period covered by this Business Plan, we will strengthen these networks and add to them further work on the development of the cluster-based approach to networks. This will enable us to use the network model to ensure that schools who have not so far engaged in, for example, the Pioneer programme for curriculum reform, will get access to schools in their own cluster who can support them in this work. The impact of this work will be captured systematically through the FADE approach on a termly basis.

#### 5. Regional Key Stage Targets 2016-2019 and Local Authority Attendance Targets

The targets below are derived from the information submitted by all schools across South East Wales during the statutory target setting process in autumn 2016. The target setting process across the region is robust with all LA / school aggregate targets linked to individual pupils.

To ensure that appropriate aspiration is applied across schools, a joint challenge process has been introduced by LA Officers and EAS staff. This process considers an analysis of projected future performance against previous performance, projected Free School Meal benchmark quarters, FFT estimates and WG modelled expectations.

Targets for 2018 onwards remain draft subject to additional challenge and scrutiny during the next iteration of the process in 2017. Individual LA aggregate targets can be found in the accompanying LA Annex documents.
